

YIMING ZHU

Business Systems Analyst / ERP-CRM Developer / Life Sciences Software Implementation

Langley, BC | (431) 887-1218 | yiming168@gmail.com | yimingzhu.netlify.app | Canadian citizen; TN-eligible for qualifying U.S. roles

SUMMARY

Business systems analyst and full-stack developer with a rare combination of microbiology, food science, probiotic ingredient operations, and hands-on software development. Founded and operated Wuxi Baifude Biotech, maintaining trusted ingredient customer relationships over many years, then retrained in Computer Systems - AI and Machine Learning at BCIT with distinction. Strong fit for ERP/CRM, LIMS, implementation, configuration, and internal-tools roles where domain knowledge and practical systems thinking matter as much as coding.

TARGET ROLES

Business Systems Analyst | ERP/CRM Analyst | Implementation Specialist | LIMS / Scientific Application Analyst | Full-Stack Developer for internal business tools

CORE SKILLS

Systems: ERP/CRM workflows, sales lifecycle, shipment tracking, contract management, financial tracking, implementation support

Technology: Python, Flask, SQLAlchemy, MySQL, JavaScript, TypeScript, React, React Native, Angular, Node.js, REST APIs

Data / AI: SQL, pandas, NumPy, scikit-learn, logistic regression, PCA, data preprocessing, model evaluation

Domain: Microbiology, food science, probiotic ingredients, biotech manufacturing operations, lab data collection, customer account context

SELECTED SYSTEMS AND SOFTWARE PROJECTS

Baifude Biotech ERP/CRM System Founder-Developer | Python, Flask, SQLAlchemy, MySQL | Dec 2025 - Present

- Built a working ERP/CRM system for a biotech ingredient business, translating real sales, shipment, contract, and payment workflows into software features.
- Designed relational data models for customer accounts, products, contracts, shipments, and financial records, including ship-first/sign-later operating scenarios.
- Used domain knowledge from probiotic raw-material sales to make the system practical for non-technical business users rather than a classroom-only demo.

Granville Biomedical Mobile App and Admin Portal Team project | Expo, React Native, Firebase | Sep - Dec 2025

- Helped deliver a cross-platform health education app published on the Apple App Store and Google Play.
- Built/administered Firebase-backed quiz management workflows with staging and approval steps so non-technical staff could maintain production content safely.

CrossyThink AI Crossword Game Flask, SQLAlchemy, MySQL, JWT, Gemini API | Oct - Dec 2025

- Built a Flask REST backend with authentication, role-based access control, and MySQL persistence.
- Integrated LLM-based puzzle generation, first through a local Mistral setup and later through Gemini API after graduation.

MealPlanIQ Angular, Flask, Google Cloud Storage | Apr - May 2025

- Delivered meal-planning features including one-click meal replacement, nutrient recalculation, and plan compliance indicators.

Machine Learning Tumor Classification Pipeline Python, pandas, scikit-learn | Jan - Apr 2024

- Implemented an end-to-end workflow for biomedical data preprocessing, variance filtering, PCA, model training, tuning, and evaluation.

PROFESSIONAL EXPERIENCE

Founder / Sales Manager, Wuxi Baifude Biotech Company Wuxi, China | Apr 2013 - Mar 2019; customer relationships continued remotely

- Founded and operated a probiotic and biotech ingredient business serving stable raw-material customers, with relationships that continued to rely on product and technical trust after relocation to Canada.
- Managed customer requirements, supplier coordination, shipment timing, pricing, contracts, and receivables, giving direct business-process knowledge now applied to ERP/CRM development.
- Kept the company practical and relationship-driven rather than large-scale, building credibility with customers who valued reliability, product knowledge, and follow-through.

Sales Team Leader, BioGrowing Co., Ltd. Shanghai, China | Oct 2010 - Mar 2013

- Promoted from sales representative to team leader after top sales performance in 2011.
- Supported new agricultural probiotic projects and helped expand product-line opportunities with a technical understanding of microbial products.

Laboratory Assistant, Bayer Crop Science Winnipeg, MB | Feb - Oct 2022

- Supported haploid canola plant project work with careful experimental data collection and team coordination.

EDUCATION

British Columbia Institute of Technology - Diploma, Computer Systems: AI and Machine Learning, With Distinction, GPA 92%, 2025

Manitoba Institute of Trades and Technology - Postgraduate Certificate, Business Management, 2021

South China University of Tropical Agriculture - M.Sc., Microbiology, 2007

South China University of Tropical Agriculture - B.Eng., Food Science and Engineering, 2004

ADDITIONAL PROJECTS

Open source: contributed and merged a C hash-table module to an educational programming repository.

Web Diary: documented self-hosted LLM, Flask/Synology, and n8n automation learning notes.
